Pressure Upon New York Exchange Relaxed Yesterday.

STATE OF MONEY MARKET

CAUSE OF IRREGULARITY ON WALL STREET DURING WEEK.

New York, Oct. 5.-The Lollday in London today accentuated the dullness ere and tended to relax the selling pressure as London has seen a con stant seller in this market of late. The fact that there is no loan market at the stock exchange on Saturday also tendket. Perception is growing of the fact that the question of the effect of the interior demand for money on the stock

interior demand for money on the stock market has passed the stage of argument and has resolved itself into a question of how much further stock market liquidation may have to extend. While there has been no stringency of money during the week, this has been due to the fact that in reducing their outstanding loans bankers have been discriminating against industrial collateral rather than marking up the ruling rates for call loans. Owing to the continued firmness of sterling exchange, in spite of a larger supply of cotton bills this week, relief by gold imports does not appear imminent. Demand continues from bankers short of exchange and experts in that market declare that a large short interest remains to be covered during November. It is said that some fresh sterling loans have been negotiated this week. The loan increase in the bank statement revealed that other forces are still at work in the credit market which offset the stock market liquidation. Tais and the renewed pressure against Amalgamated Copper depressed the whole market.

the whole market.

There has been some irregularity in the stock market from time to time during the week and dealings have been during the week and dealings have been on a small scale. The course of prices in the main has been downward and the weakness increased during the latter part of the week. The support of the market at the weak soots, which was a feature during the cris.. following the assassination of President McKinley and which was attributed to the joint efforts of the great banking and financial powers of the country, has been conspicuously lacking. The liquidation has not been heavy nor apparently urgent but very light demand was forthcoming at the declines and there seemed to be a general agreement of sentiment in the street that a reactionary movement was due and reactionary movement was due and need not be contested.

man there seemed to be a general agreement of sentiment in the street that a reactionary movement was due and need not be contessed.

This is an acquiescence in the normal course of prices of securities at this time of the year when the largest demands are annually made upon the money markets for fall trade, the moving of the crops and the period of waiting for the situation to shape itself concerning the outlook for the coming year. The artificial support which was considered necessary. The opportunity having been given for one considered necessary. The opportunity having been given for one consideration and preparation to meet the ultimate offects of that event, the market has been left to the natural play of forces. So far as the general outlook is concerned, confidence has been maintained. Trade returns are encouraging in practically all branches. Bank clearings the country over continue at a record figure. Halfroad carnings are still at a higher level than last year, though the ratio of increase is running somewhat less than for earlier weeks and months for some time past.

A feature of many of the railroad reports coming to hand, both for transcontinental and trunk lines, is the fact that increases in net earnings are achieved on a somewhat lessened volume of actual tomnage moved. This is a practical demonstration of the healthy effect of the maintenance of treight movement is not an entirely reassuring fact. In part this condition is due to the higher grade of much of the freight which is moved and which is a natural consequence of the prosperous conditions of the country. The east ward movement of agricultural products shows a falling of partly wing to the shortage of the corn crop and the holding back of cotton. But

of the freight which is moved and which is a natural consequence of the freight rates of the country. The easi, ward allies of the country products shows a falling of partiy owing to the shortage of the corn crop and the holding back of cotton. But the westward movement of merchandise, whose classification is under higher freight rates, has continued at an unprecedented volume.

While this condition has served to sugtain railroad earnings, it is obviously not a self-perpetuating condition, as it is in effect due to the enjoyment of past prosperity. Conditions in the steel trade are very encouraging. Coloubles the settlement of the sweek, is an indication of the healthy condition in the trade.

The withdrawal of artificial support from the stock market revealed some disturbing conditions as to the status of many stocks which had been mostly subjected to mainjuation. Some of the minor railroad stocks which had been mostly subjected to mainjuation. Some of the minor trailroad stocks which had been mostly subjected to mainjuation. Some of the minor trailroad stocks which had been subjected to operations by speculative pools suffered wide relapses, but he most striking effects were shown in the most prosperous times at the prices into fragments.

Several factors combined to awaken the latent distrust with which these securities are habitually regarded and and which is reflected in the month has caused increasing attention to the iack of public information regarding conditions of other industrial corporations whose stocks resoluted in a collapse of the rate of dividend return. The nominal cause was the declared constitutivitionality of an anti-trust law of New York and the stream of the reason of
